ABOUT US

About us

Advance Commerce Technology Co., Ltd. was founded in 1992 (B.E. 2535). We are a Thai company based in Lam Luk Ka, Pathum Thani. For more than 30 years, we have supplied industrial adhesives and process materials to manufacturers and electronics producers across Thailand under the ADVANCE brand and website.

We work with maintenance, production and purchasing teams, starting with the actual application: the parts that need to be bonded, sealed or locked; how the adhesive will be applied on the production line; and the conditions the parts will face after assembly. From there, we help identify a suitable grade, arrange supply and provide a quotation, together with the technical documents needed to support the decision.

WHAT WE DO

What we do

Product selection based on the application

Tell us about the materials, joint, application method and service conditions. We compare suitable grades using the manufacturer's technical data.

Technical and process consultation

We help review how products are used on the production line, including surface preparation, dispensing, curing and troubleshooting.

Clear quotations

The grade, pack size and quantity are confirmed before you place an order.

Product documentation

TDS and SDS documents for each grade are available from the product pages, as published by the manufacturer.

How we work with you

1

Tell us about the application

Materials, joint, application method and service conditions. You can also send photos of the parts via LINE.

2

Product selection

We compare suitable grades using the manufacturer's technical data.

3

Confirm details and receive a quotation

Grade, pack size and quantity.

4

Test on actual parts

Your test results are the final basis for approval.

OUR BRANDS

Brands we supply

LOCTITE

Threadlockers, instant adhesives, structural adhesives, sealants, liquid gaskets, thread sealants, retaining compounds and electronics assembly materials

BERGQUIST

Thermal interface materials, including thermal pads and gap fillers

TECHNOMELT

Hot melts and low pressure molding materials

TEROSON

MS Polymer and polyurethane adhesives and sealants

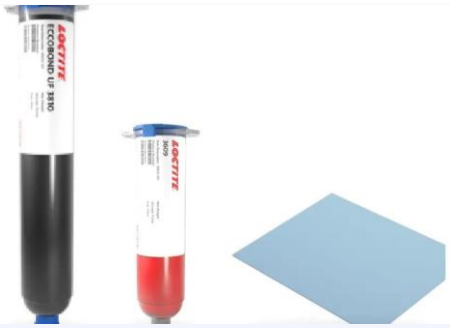

PRODUCT GROUPS

Product groups

Industrial adhesives

- Threadlockers — help prevent nuts and screws from loosening under vibration
- Thread sealants — for sealing pipe threads and fittings
- Liquid gaskets and flange sealants
- Retaining compounds — for securing bearings, bushes and shafts
- Instant adhesives
- Structural adhesives, epoxies and acrylics
- Silicone and MS Polymer sealants
- Cleaners, primers and activators
- Maintenance products

Electronics materials

- Surface mount adhesives (SMT)
- Underfill, glob top and encapsulants
- Potting compounds and conformal coatings
- Electrically conductive and die attach adhesives
- Thermal management materials (BERGQUIST)
- Low pressure molding materials (TECHNOMELT)

Tapes and consumables, along with other products, for maintenance and production lines

FREQUENTLY USED

Frequently used products

LOCTITE 243

Medium-strength threadlocker

General nuts and bolts; removable with hand tools

LOCTITE 263 / 277

High-strength threadlocker

Studs and bolts that are not removed often

LOCTITE 401

General-purpose instant adhesive

Small parts, rubber, plastics and metals

LOCTITE 638

Retaining compound

Bearings, bushes and gears on shafts

LOCTITE 518

Liquid gasket

Rigid metal flanges

LOCTITE 577

Thread sealant

Metal pipe threads

LOCTITE 3609

Surface mount adhesive

Holding SMD parts in place before soldering

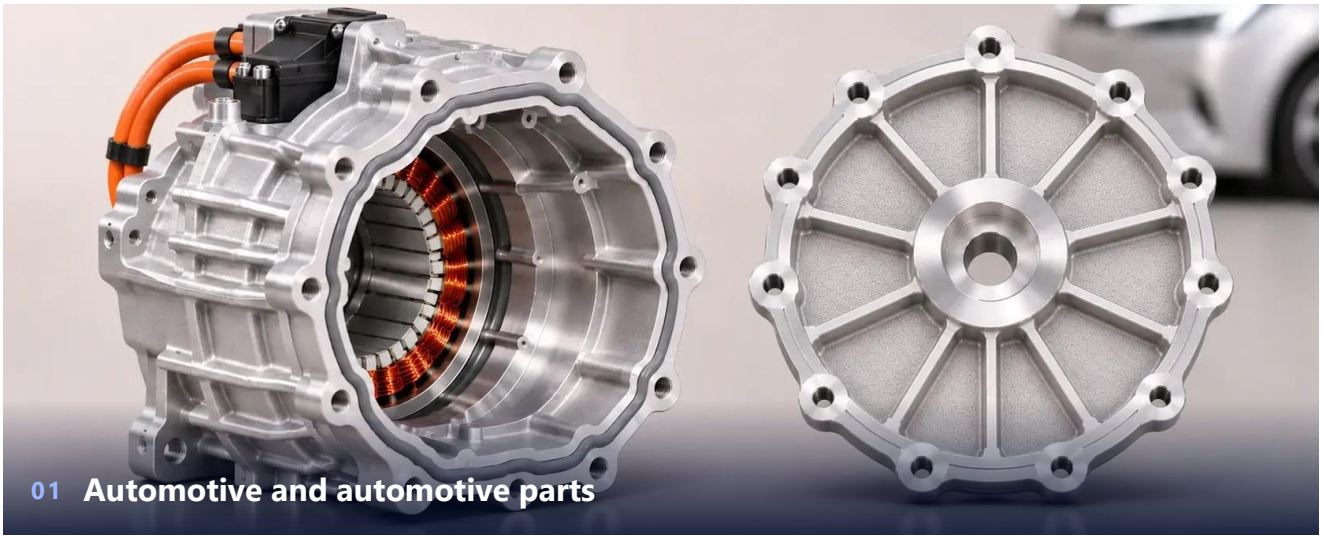

670+
